**Arrow appoints Alexis Brabant as Vice President of EMEA sales
for Arrow's Enterprise Computing Solutions Business**

London, UK – 15 May 2018 - Arrow Electronics has announced the appointment of Alexis Brabant as vice president of sales for Arrow's Enterprise Computing Solutions business in EMEA.

Brabant has almost 20 years of professional experience in the IT distribution sector. He assumes a new role in the technology provider at a time when companies are in the process of digital transformation and implementation of new solutions and undertaking technological projects that allow them to develop and strengthen their businesses.

Brabant joined Arrow through the acquisition of the company of which he was founder (Mambo Technology) by the Altimate group in 2009, which was acquired by Arrow in 2012.

The good performance of Brabant in each of the positions he has held within Arrow has led him to an outstanding and ascending career where he has been regional director of Iberia and country manager for Spain, vice president for the South of EMEA (France Spain, Portugal, Italy and Israel), and later, vice president of the company for Southern Europe, Nordic Region and Eastern Countries.

"This appointment is clearly a vote of confidence on the part of the company, for which I feel tremendously grateful. I assume with great enthusiasm and commitment" said Alexis Brabant.
